

## **Project: "Create and Organize Your Personal Directory"**

### **Objective:**

To practice navigating directories, viewing contents, creating directories, and displaying basic information about the system.

### **Steps:**

**Create a new directory.**

**Navigate into the directory.**

**Display the current working directory.**

**Create subdirectories inside the project.**

**List the contents of the `Student_Project` directory.**

**Display the system's username:**

**Create a message in the terminal**

**Bonus: combine commands with ;**
